

PFHLOW

READ ME

Welcome to Pfhlow. It's a multiplayer carnage and king of the hill level that uses some new concepts, mostly in terms of the liquids. It is highly recommended that you download and install the Texture Enhancement pack, or get a script for transparent liquids. This level comes with its own built-in physics and five variances of the map (different in more than just their liquids), all available in this package.

TO INSTALL (YOU SHOULD KNOW THIS BY NOW):

- 1.) Download Marathon Infinity and Aleph One.
- 2.) Place the Infinity files in the Aleph One folder.
- 3.) Place the Pfhlow map into the Aleph One folder.
- 4.) Open Aleph One.
- 5.) Go into Preferences > Environment and choose "Pfhlow" for the map file.
- 5a.) For best results, go into the Player preferences, and select the difficulty "Total Carnage".
- 6.) Press begin new game.
